Technical Appendix 10.4: Revised Cultural Heritage Viewpoints

- 1.1.1. **Table 10.4.1** below lists the cultural heritage viewpoints used to inform this Proposed Varied Development assessment. Given the increase in proposed turbine maximum tip height and revised layouts of associated infrastructure, there is the potential for changes to cultural heritage setting impacts. The following visualisations have been used in-combination with the updated blade-tip height Zone of Theoretical Visibility (ZTV) (**Volume 4, Figure 10.2**) to assess the predicted degree of theoretical visibility.
- 1.1.2. Each viewpoint (VP) includes an individual Figure wireline with the following; Proposed Varied Development, the Consented Development and with the relevant Cumulative developments. An additional photomontage has been produced for **CHVP2-5**.
- 1.1.3. All visualisations listed below are updated versions of those produced in the previous 2018 EIA Report (SSE Renewables 2018), except for **CHVP1** and **CHVP5** which have been produced at the request of Historic Environment Scotland (HES).
