“WE WANT TO BUILD GENUINE PARTNERSHIPS WITH COMMUNITIES, NOW AND FOR THE FUTURE.”

Alistair Phillips-Davies
Chief Executive

FOREWORD

SSE is involved in a business that really matters – providing the energy people and business need. So we must do it responsibly. That includes being a responsible neighbour, going beyond the minimum and becoming an active contributor in the communities where we live and work.

This is particularly relevant to the community funds we provide for our renewable energy projects. We’ve led the way by setting the £5,000 per megawatt benchmark for community benefit payments and, with over £4.5 million distributed in Britain last year alone, our funds are providing significant financial assistance to community projects up and down the country.

However, it’s not simply about **what** we do, it matters **how** we do it too. It is important that our funds are managed in the right way, by building genuine partnerships with communities now and for the future.

It is also important that our actions are transparent, sustainable and accountable to the wider community. This first Annual Review is a key step in this process. It sets out the principles that underpin our community investment policy, showing you what we are doing, how we’re doing it and, ultimately, where your money is going.

Finally, I would like to thank the dozens of panel members who give up their time to assess grant applications and make sure SSE’s community funds are spent wisely.

I hope you are inspired, like me, by the projects funded this year and the positive impact they will have for many more years to come.

Alistair Phillips-Davies
Chief Executive

Local volunteers outside the Barr Community Store in South Ayrshire, which is now wholly run by the local community thanks to a £68,000 grant from the Hadyard Hill Community Benefit Fund. Operated on a not-for-profit basis, the store also hosts a cafe, the local post office and even a pizzeria at weekends.

BEING A RESPONSIBLE NEIGHBOUR

SSE HAS BEEN BUILDING AND OPERATING WIND FARMS SINCE 2002. COMBINED WITH OUR HYDRO-ELECTRIC SCHEMES, MANY OF WHICH HAVE BEEN IN OPERATION FOR OVER 50 YEARS, WE ARE NOW THE LARGEST GENERATOR OF RENEWABLE ENERGY ACROSS GREAT BRITAIN AND IRELAND.

Communities can benefit from our renewable energy projects in many ways: from the local contractor providing civil engineering work onsite; the hotels and restaurants that see their trade increase during the construction period; to the local workforce that secure long-term careers in the operation of the development.

SSE is committed to maximising these opportunities wherever we can and we have a strong track record of promoting local business. This is illustrated by our open4business web portal and 'Meet the buyer' events, which connect local firms with buyers

from SSE and our supply chain. The employment opportunities are significant too. Around 2,000 people work in SSE's energy generation business and a 50MW onshore wind farm typically supports around 385 jobs during its construction.

Community funds

In addition to these benefits, SSE also recognises that new renewable energy projects should help communities in other ways.

As part of a responsible approach to development, a financial contribution is paid to the communities that host wind farms and hydro schemes. These are long-term funding programmes, related to the generating capacity of the site and are distributed across its lifetime. They are separate to the planning process and have no bearing on any decision on consent of a project.

"WE WANT TO SHARE THE BENEFITS OF WHAT WILL BE A 25-YEAR PARTNERSHIP BETWEEN SSE AND THE COMMUNITY."

We make this contribution in part, to recognise the short- or long-term impacts a development may have on an area – be it from increased construction traffic or the ongoing presence of the site. However, we also want to share the benefits of what will be a 25-year partnership between SSE and the community, recognising our role in supporting economic and social development and enabling local regeneration. Put simply, it's about being a responsible neighbour.

Listening to communities

Since the first community investment fund in 2002, we have learned a lot from listening to local communities. As you'd expect, communities don't always agree – but the way we operate our funds today has evolved, largely down to feedback from local people.

HELPING LOCAL BUSINESSES GROW – THE LOVAT

The four-year construction of SSE's Glendoe hydro scheme brought many benefits to businesses in the area, which traditionally relies on seasonal tourist trade. One of the main beneficiaries was The Lovat, a 28-bed hotel in Fort Augustus, which received thousands of accommodation, restaurant and event bookings from SSE and its contractors, increasing its revenue by £500,000.

Owner, Caroline Gregory explains: "We're now open year-round and without Glendoe that certainly wouldn't have been the case. The development gave the whole area a lift."

An estimated contribution to the UK economy of

£15.5 million*

and support for

385 jobs*

during the construction phase

A contribution to a community benefit fund of

£6.25 million

over 25 years

For example, the financial level of benefit has risen significantly in the last decade. In 2011, we became the first developer to announce a nationwide policy of providing £5,000 p/MW per year for new onshore wind developments – roughly £15,000 per year for every modern wind turbine. This is now the recommended level in both UK and Scottish Government guidance – a move SSE supports to bring consistency across the industry.

Partnership

We've changed in other ways too. SSE is now a large grant funder, awarding over £4.5 million in Britain last year alone, and with an estimated

“SSE IS NOW A LARGE GRANT FUNDER, AWARDING £4.5M IN THE LAST YEAR ALONE.”

£130 million of funding available in the next two decades, we have a duty of care to ensure this large scale investment makes an impact.

We recognise that providing a community with large sums of money has the potential to do a great deal of good; it also has the potential to divide. That's why we work directly with communities, as partners, to help them distribute their funds in a way that is appropriate, consistent and accountable to the wider community.

We also recognise that, by its nature, community benefit can be focused on very narrow geographical areas which can be limiting against a desire to support genuinely transformational projects. That's why, for all new developments, we provide both a local and regional fund, allowing investment over a wider area.

Sustainable difference

At a time when so many sources of funding are under increasing pressure, community benefit is proving to be a long-term income stream for communities to realise their ambitions and make a sustainable difference to their local area.

It is SSE's job to make sure this continues to be the case, so that in 20 years time, when today's wind farms are reaching the end of their operating life, the legacy of the funding is still clear to see.

HOW WE CALCULATE AN ONSHORE COMMUNITY WIND FUND

Since January 2012, SSE's community benefit policy commits a payment of £5,000 per megawatt (MW) per year for the lifetime of a scheme, up to 25 years, split between a local and a regional fund. The size of a wind farm is measured in terms of 'installed capacity'. This is the maximum theoretical output of the wind farm, measured in megawatts. Every wind farm is different, meaning the size of community funds varies from site to site, however the basis of the calculation stays exactly the same.

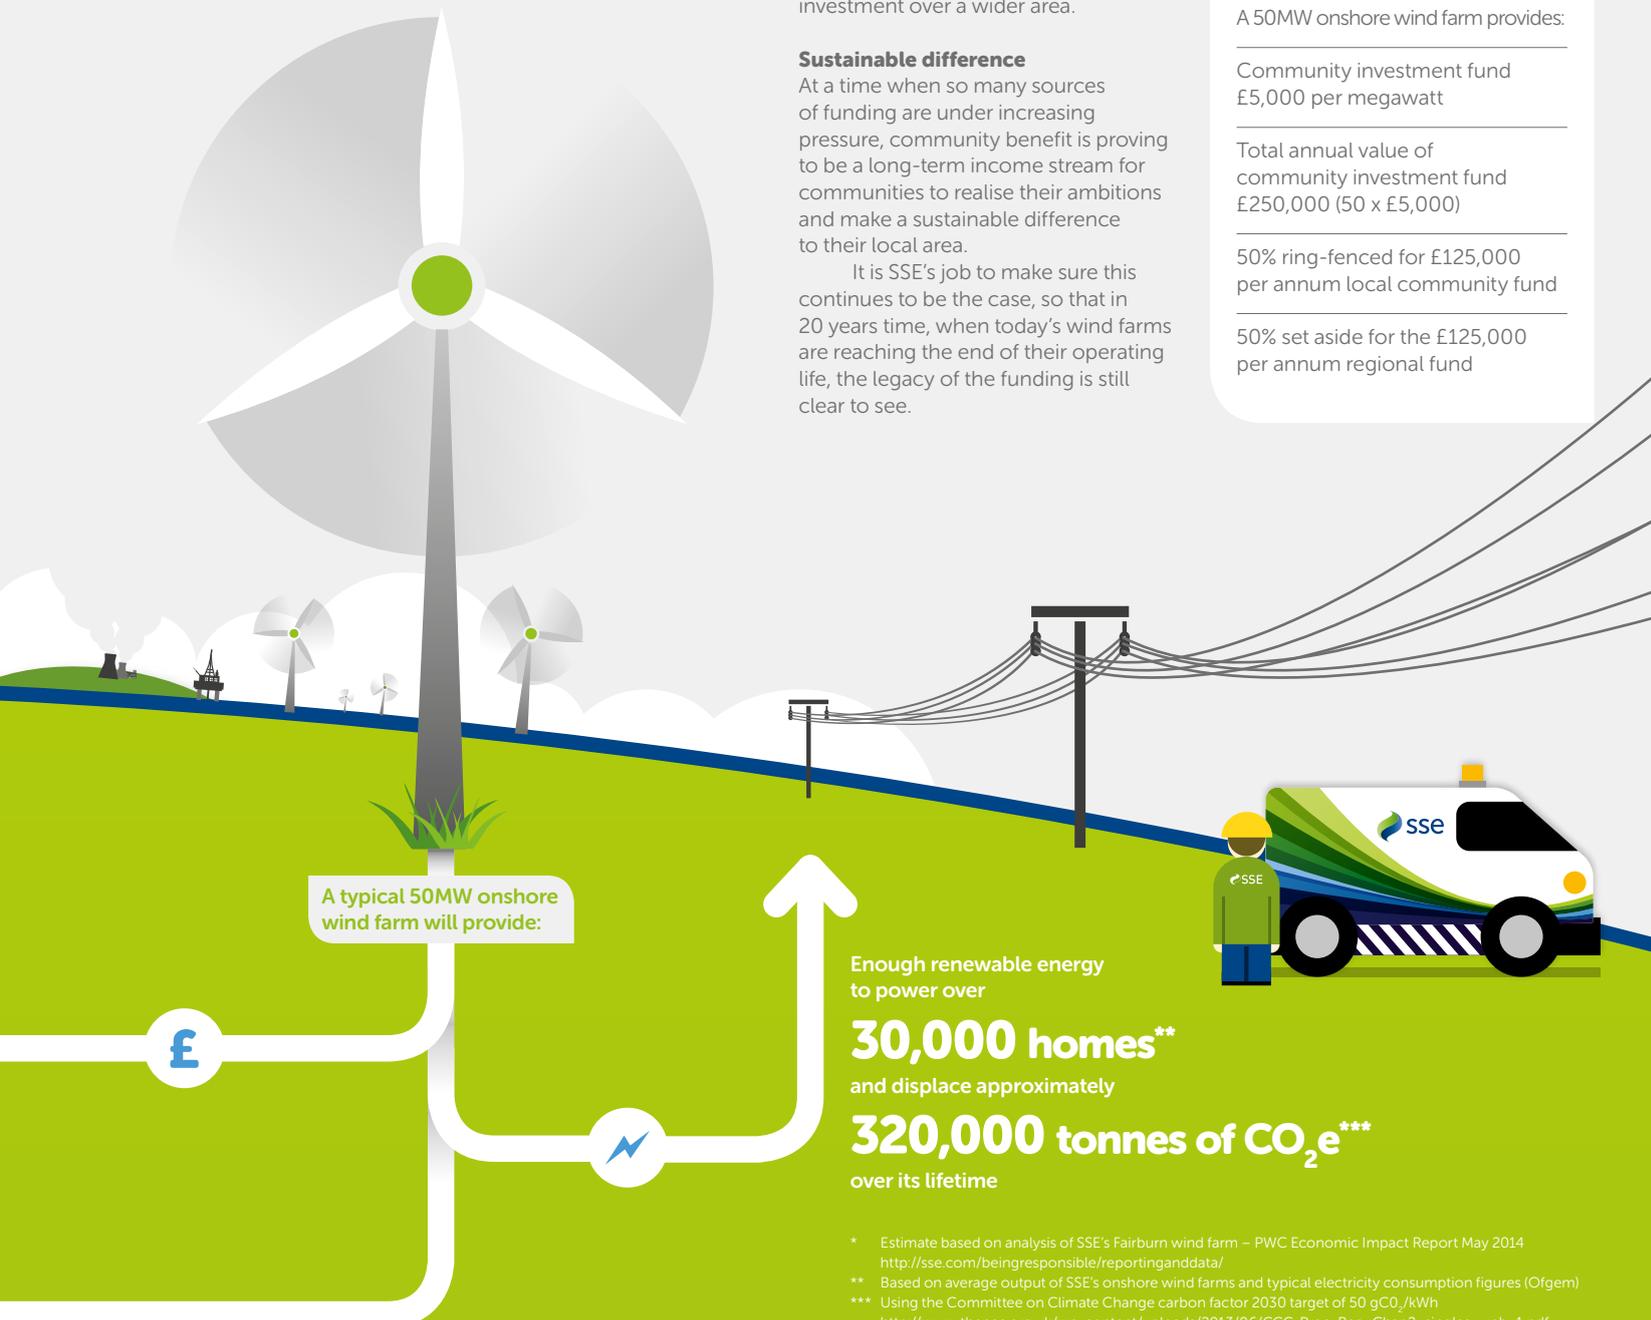

A 50MW onshore wind farm provides:

Community investment fund
£5,000 per megawatt

Total annual value of
community investment fund
£250,000 (50 x £5,000)

50% ring-fenced for £125,000
per annum local community fund

50% set aside for the £125,000
per annum regional fund

BUILDING SUSTAINABLE PARTNERSHIPS

AS BOTH A DEVELOPER AND GRANT MAKER, SSE IS COMMITTED TO TAKING AN ACTIVE AND LONG-TERM ROLE IN THE DELIVERY OF COMMUNITY FUNDS, WORKING AS A PARTNER WITH COMMUNITIES THROUGHOUT THE FUNDING PROCESS.

Unusually for a developer, we manage and administer the majority of our funds directly. This helps us build a closer relationship with each community, resulting in a greater level of trust. It has also created an environment where we have open and direct lines of communication with communities to improve our processes and help them to best harness the potential of their funds.

Local decision-making

We operate a competitive grant scheme, where not-for-profit organisations in the community can apply for funding. We believe that communities are best placed to make the decisions about their needs and aspirations and, as such, we champion local decision-making.

In some cases we work with an existing community organisation, such as a trust or community company, however our preferred method is to establish a panel of local residents who review applications and evaluate

which projects to support. Setting up a panel can often bring disparate areas together and the process, while initially challenging, can forge stronger and closer links between different communities.

The geographical spread of our developments is such that the local funds are predominantly shared by remote rural areas. This presents an opportunity to safeguard the future of these often fragile communities where a declining population and loss of industry have been detrimental to the local economy. We support and encourage the creation of community action plans which set out priorities identified by the community for regeneration and long-term development.

Flexible

The flexible nature of our community investment programme can allow for either 100% funding or vital leverage capital to attract 'match-funding' finance from other grant bodies. Multi-community projects are encouraged; where larger sums of funding are pooled to finance a major project benefitting several neighbouring communities. We have also introduced programmes such as apprenticeships and energy-efficient appliance discount schemes, tailored to the need of the individual community.

"COMMUNITIES ARE BEST PLACED TO MAKE THE DECISIONS ABOUT THEIR NEEDS AND ASPIRATIONS."

To allow smaller groups and individuals to access funding, a 'microgrant' facility for grants of up to £500 is offered through the local community councils.

Planning for the future

Many communities see these long-term funds, available for up to 25 years, as an opportunity to develop their 'big idea'. We encourage this by offering a 'draw down' facility whereby up to five years' worth of payments can be released in advance if a major project requires early investment. For example, if a community wished to undertake a buy-out of the village shop and required significant capital, a full year's allocation or more could be awarded upfront in order to facilitate the purchase. This is a valuable mechanism in allowing communities to plan for the future with more certainty than with many other sources of grant funding.

Although the funds will be around for the foreseeable future, many communities are keen to start planning for the years beyond the fund. To this end, SSE also offers an endowment fund facility whereby an annual amount of capital can be retained to produce income for distribution long after the 25-year period.

OUR FUNDING PROCESS – STEP BY STEP

Separate to the planning process for the development, we share information with communities that outlines our policy and grant-making process.

Once a wind farm receives planning consent, we liaise with local stakeholders to clarify the area of benefit and fund delivery arrangements.

We then work with the community or parish councils to set up a decision-making panel with representation from local residents.

VIEWS FROM OUR PANELS

Every one of our panel members is a volunteer who donates their time to help distribute grants to the right community projects. It is their hard work and commitment that drives the funds, and their invaluable local knowledge that shapes good decision-making.

"Over the years we've learned how to spend the fund to best effect. The awards really make a difference to local projects. It is a great example of communities and developer working together."

Marion Turner,
Achany panel

"I joined the panel because I'm passionate about my community and want our village to grow. The fund allows groups of any size to apply for a grant, no matter how small."

Frances MacGruer,
Fairburn panel

"Initially there was a tumultuous agreement process between the communities as each area had their own ideas of how the fund should operate. However, after four years of operation, we've developed a successful 'joined up approach' for the benefit of the wider area."

Paul Harrington,
Gordonbush panel

"Each project is decided on merit, regardless of which community council area it comes from. The expertise of the panel members is very important. We are keen to make sure that projects are viable and sustainable in the long-term."

Joan Brookes,
Griffin and Calliachar panel

"MANY COMMUNITIES SEE THESE LONG-TERM FUNDS AS AN OPPORTUNITY TO PROGRESS THEIR 'BIG IDEA.'"

Strategic projects

As the value of community benefit has increased in recent years, communities are looking beyond short-term solutions and are seeking to take forward projects that have a significant and sustainable impact. With this in mind, SSE has launched the Sustainable Development Fund; a pooled regional fund to support strategic projects in the regions in which we are investing. This is in addition to the local funds and applies to every wind farm constructed after January 2012.

The aim of the Sustainable Development Fund is to support projects that deliver transformational social, economic or environmental

change. An external panel reviews the applications and determines which projects should receive funding. Chaired by Lord Jack McConnell, the five-strong panel has expertise in each of the priority areas of the fund and is committed to maximising the potential of its long-term economic benefit for the wider community. Further details can be found on page 20.

Supporting communities

More and more communities are seeing the opportunities that renewable energy funds can bring – both in providing timely support to community services and in driving long-term change for

their area. As with any community development activity, local tensions can arise, but thanks to the dedication of committed volunteers, communities are now well placed to put their money to good use. By acting as a sustainable partner, SSE can support this activity, helping communities invest their funds effectively and ensure a lasting legacy for future generations.

4

At the start of major construction, we organise a fund launch event to provide information for potential applicants. Applications undergo an initial assessment by SSE.

5

Funding decisions are made by the panel at set meetings throughout the year. SSE assists the panel with administration and ensures fund transparency.

6

Grant awards are made public and recipients monitor their project and track its progress. A final evaluation report is submitted on the project and its outcomes.

MAKING A POSITIVE IMPACT IN 2013/14

2013/14 HAS BEEN A SIGNIFICANT YEAR FOR SSE'S COMMUNITY INVESTMENT PROGRAMME. WITH A TOTAL SPEND OF OVER £4.5 MILLION IN GREAT BRITAIN, THE SCALE AND IMPACT OF OUR COMMUNITY FUNDS HAS NEVER BEEN MORE EVIDENT.

From 22 active funds, 366 grants were issued to not-for-profit organisations during 2013/14 – more than one a day – including the first awards from the new regional SSE Sustainable Development Fund.

The demand for funding continued to increase this year with more than twice the value of applications received as funds available. Successful submissions included support for 41 sports clubs, 30 local events and festivals, five community buy-outs and our single largest grant to date – a £620,000 award to the Biggar Museum Trust to develop a new heritage centre in South Lanarkshire.

“FROM 22 ACTIVE FUNDS, 366 GRANTS WERE ISSUED – MORE THAN ONE A DAY.”

Fund milestones

Three new local funds made awards for the first time during 2013/14: the £170,000-a-year Keadby fund in North Lincolnshire; Hunterston in North Ayrshire; and Langhope Rig in the Scottish Borders. In addition, the first grants from the SSE Sustainable Development Fund were awarded, with 30 community organisations receiving over £1.4 million.

Important milestones were reached at Griffin and Calliachar in Highland Perthshire, where they broke through the £1 million funding barrier; and at Gordonbush in Sutherland, which awarded its 100th grant since the fund's launch in 2011.

Diversity

At £4.56 million, the overall value of funding rose by nearly 40% compared to the previous 12 months, with the varying range of funded projects testament to the diversity of each community and the challenges that they face. The largest category of support was for projects that benefit culture, heritage and tourism, indicative of the

reliance on tourism in many of the areas of benefit. An increased focus on employment and skills development was also evident, with our funds supporting 328 work and training placements to a value of over £500,000. Grants to develop community facilities and services were also popular, making up almost a quarter of the funds awarded.

Pioneering ideas

There was also evidence of increased innovation, with local community groups developing pioneering ideas like community broadband collectives and even re-establishing community 'runrig' allotments. In addition to the awards made throughout the year, it was also encouraging to see some previously funded projects come to successful fruition – like The Birks Cinema, which reopened its doors for the first time in over 30 years.

Although general fund demand was high, some funds remain under-utilised. Where demand is low, we are working to promote the availability of the fund and to help communities build capacity to progress new projects.

Top left: Young canoeists from the Breadalbane Canoe Club, which received £29,500 from the Griffin and Calliachar community fund.

Right: Fairburn Memorial Hall in Ross-shire is just one of the many community facilities that have received support from SSE wind farm funds.

Far right: Runners at the start of the 2013 Highland Perthshire Marathon, an event funded by the Griffin and Calliachar community fund. See p16 for more.

Leverage

As well as helping communities to kick-start new projects, the funds can also act as crucial leverage funding to secure additional external finance for a project. To set this in context, for every £1 SSE granted in 2013/14, on average, grant recipients were able to secure another £3 in funding from other sources. In other cases, SSE's grant provided the final component in a funding package, giving the project the 'green light' to proceed.

The wealth of projects supported this year demonstrates the commitment of local communities to regenerating their area and building strong foundations for the future.

Projects supported during 2013/14

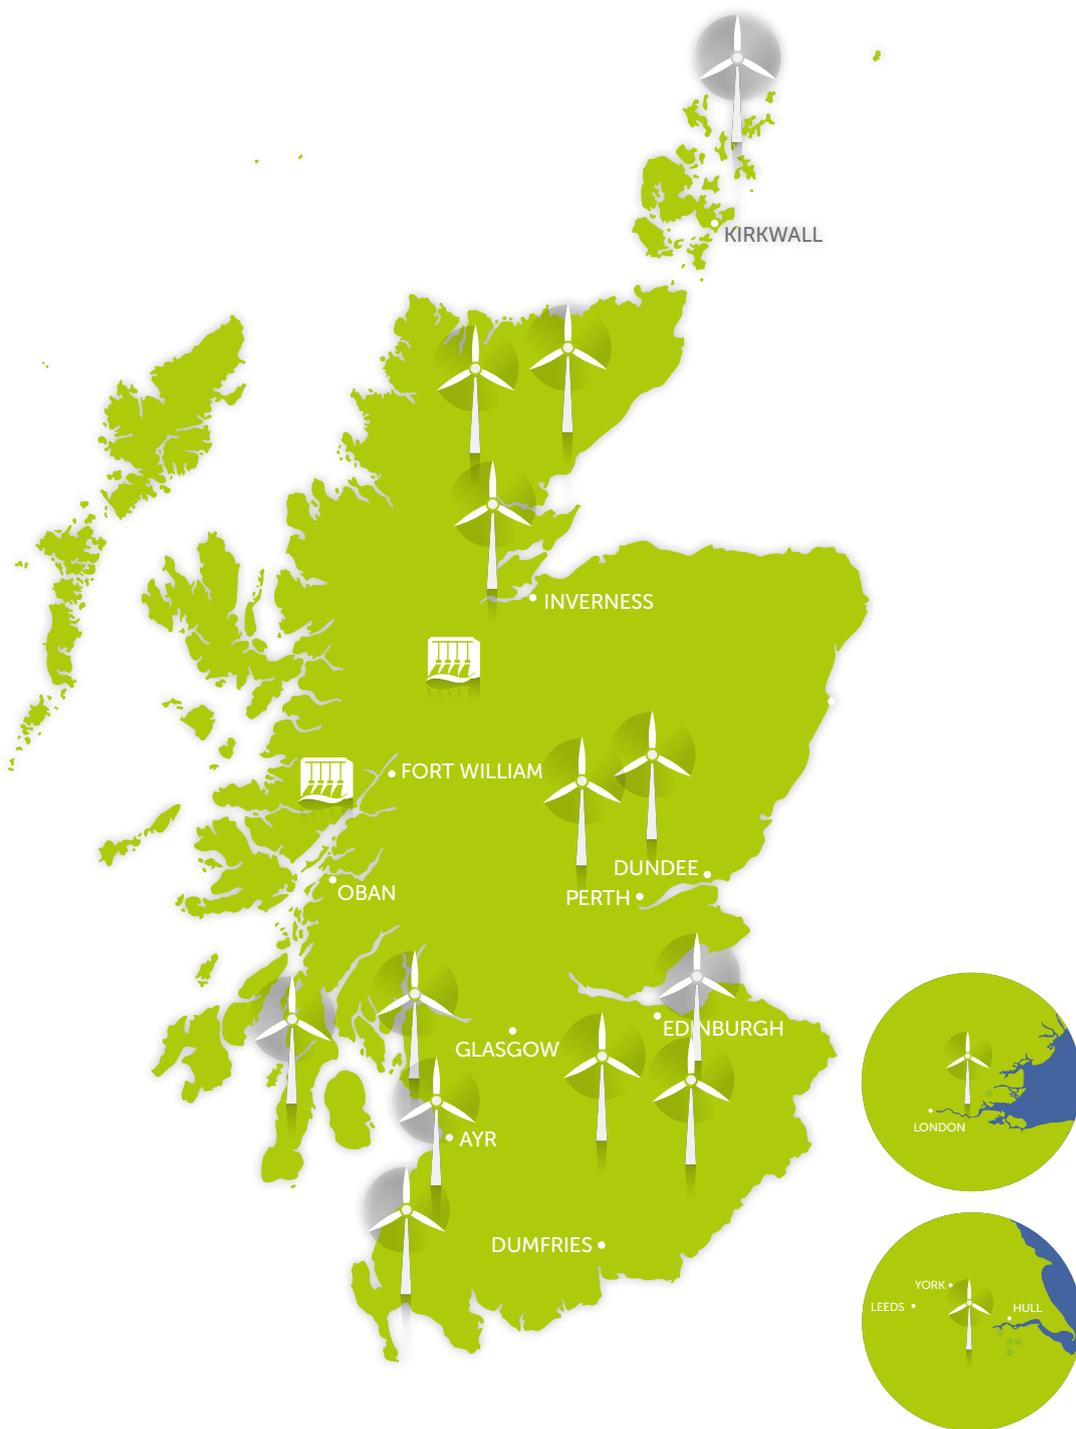

366

Average fund demand – 2013/14

258%

Average grant value – 2013/14

£12,473

SSE IRELAND

SSE also provides community funds for our renewable developments in the island of Ireland. Since 2003, SSE Ireland has provided funding to more than 1,500 community projects across Northern and the Republic of Ireland.

For more info visit:
<http://ireland.sse.com/community/community-funding/>

Total funds awarded in 2013/14 (1 April 2013 – 31 March 2014)

£4,564,991

STRENGTHENING COMMUNITY SERVICES

BY INVESTING IN COMMUNITY FACILITIES AND SERVICES, SSE COMMUNITY FUNDS CONTRIBUTE TO THE LONG-TERM SUSTAINABILITY OF THE AREAS THEY SERVE, BRINGING PEOPLE TOGETHER, REDUCING ISOLATION AND BUILDING A STRONGER SENSE OF COMMUNITY.

Over £1 million was awarded to 130 community facilities and services in 2013/14, ensuring that local amenities will be maintained and improved in rural communities that often suffer the closure of these vital provisions.

Last year over £83,000 was awarded to lifeline services in rural areas. The purchase of community equipment such as defibrillators bolsters resilience in remote locations that can often experience longer waiting times for emergency responses. Key community buildings were also supported with over £135,000 awarded to community buy-out projects and around £480,000 invested in village hall improvement schemes.

HEARTLAND FM

Heartland FM community radio station was awarded £23,782 in June 2013 towards a much needed upgrade of their equipment.

Heartland FM was set up in 1992 in response to the limited radio provision in the Highland Perthshire area. Today, with an audience of around 6,000, the station provides a unique broadcasting platform for local issues and also trains volunteers in all aspects of radio production.

An award from the Griffin and Calliachar community fund allowed the station to upgrade its equipment which had been in place since its launch 22 years ago. The state-of-the-art technology has reduced the risk of going "off air" and significantly improved maintenance time. The provision of a modern training facility means the station can reach higher numbers of young people and volunteers.

"Heartland FM reflects local needs and issues through a community voice by providing accessible communication, employment, and training opportunities."

Bruce Patterson, Heartland FM

TAYSIDE MOUNTAIN RESCUE TEAM

In 2013, the Tayside Mountain Rescue Team's Land Rover was used in 54 emergency call-outs.

Tayside Mountain Rescue is run by a local volunteer team that provides emergency and community resilience services across an extensive 3,500 square mile area. It is one of 27 volunteer Mountain Rescue Teams in Scotland, with over 1,000 volunteers.

The team was awarded £20,000 from SSE's Griffin and Calliachar community fund in 2012 to purchase a new Land Rover for use in emergencies. The vehicle has proven to be a vital resource when adverse weather means a helicopter can't reach injured or lost walkers, and is essential in helping the team to access remote and difficult terrain to conduct searches.

"A rescue vehicle such as a Land Rover is the only all-terrain vehicle that can transport team members safely and efficiently. Having the right vehicle makes all the difference when it comes to saving lives."

Stuart Johnstone, Tayside Mountain Rescue

“THE ACQUISITION OF THE POST OFFICE IS THE FIRST MAJOR STEP IN BRINGING ABOUT NEW EMPLOYMENT AND ECONOMIC OPPORTUNITIES FOR THE AREA.”

**Marion Turner, Director,
Kyle of Sutherland Development Trust**

BONAR BRIDGE POST OFFICE

In October 2013, the Kyle of Sutherland Development Trust was awarded £5,500 towards the acquisition of the Post Office in Bonar Bridge, and subsequently received £43,300 in March 2014 to redevelop an attached property into affordable rental accommodation.

The branch in Bonar Bridge is the last remaining fully functioning Post Office in the area. The Post Office had been on the market for over two years but private sale offers were not forthcoming and threatened the closure of the service altogether. The Trust subsequently received strong community support to buy the property and the attached house.

The award from the Achany community fund facilitated this purchase, safeguarding two jobs. The attached accommodation will be redeveloped to provide affordable housing for a local family. The Trust was granted £43,300 in March 2014 from the SSE Highland Sustainable Development Fund for these renovation costs and it is hoped that the first tenants will take up residence by the end of the year.

The Post Office is a cornerstone of village life and the buy-out has been welcomed in a community that has seen significant retail closures over the last few years, as well as considerable job losses due to the recent closure of two major tourist attractions in the area.

"TAKING ON AN APPRENTICE KEEPS A YOUNG PERSON IN THE VILLAGE AND ALLOWS THEM TO MAKE A CAREER LOCALLY, SOMETHING THAT IS BADLY NEEDED IN OUR AREA."

**James Lockhart,
A&D Lockhart Joiners and Decorators**

KYLE OF SUTHERLAND APPRENTICESHIP SCHEME

In September 2013, Lairg-based A&D Lockhart Joiners and Decorators was awarded £5,635 from the Kyle of Sutherland Apprenticeship Scheme to support the costs of an apprentice.

The Kyle of Sutherland Apprenticeship Scheme was created in 2011 by the Achary community fund panel, supported by Foundation Scotland and SSE. With an initial investment of £114,000 and a remit to support local economic growth and increase youth employment, the scheme has matched eight young people in the Lairg, Bonar Bridge and Ardgay area with a local business who could not otherwise afford to train an apprentice.

Charlie Monk, one of the young apprentices who takes part in the Scheme, said "I feel very lucky to have this job as few people my age will get the same chance. The apprenticeship will give me important skills to carry all through life."

Charlie, aged 16, is studying for an SVQ Level 3 in Carpentry and Joinery at North Highland College while undertaking a three-year placement with A&D Lockhart Joiners and Decorators. The apprenticeship grant offsets salary and training costs making it affordable for Charlie's employer. The placement has helped Charlie to develop practical skills in his chosen trade and to build confidence in his work.

DEVELOPING SKILLS AND STARTING CAREERS

INDIVIDUALS EQUIPPED WITH THE RIGHT SKILLS AND OPPORTUNITIES ARE MORE LIKELY TO PROGRESS INTO REWARDING CAREERS. THE COMMUNITIES THAT OUR FUNDS SERVE ARE OFTEN IN REMOTE RURAL LOCATIONS WHERE ACCESS TO TRAINING IS LIMITED AND JOBS ARE OFTEN SEASONAL.

In 2013/14, over £1 million from SSE funds was used by communities to facilitate a wide variety of employment initiatives. Throughout the year, 328 work and training placements were directly supported in awards totalling over £500,000.

Investment in apprenticeship schemes provided opportunities for young people to gain skills in real work environments, as well as helping employers who may struggle with the costs of expanding their work force.

In addition to sustaining local businesses and young people in the workplace, a number of adult learning, IT and media writing workshops have been supported to encourage people of all ages to develop their abilities and realise their aspirations.

SOUTH LANARKSHIRE ENERGY ACADEMY

In June 2013, South Lanarkshire Energy Academy was awarded £266,902 from the Clyde community fund for the delivery of the Energy Academy training and employability initiatives.

South Lanarkshire Energy Academy runs training courses tailored to the energy and associated sectors, whilst addressing skills gaps and shortages, and matching job opportunities with local unemployed residents. To date, the Academy has supported a total of 180 South Lanarkshire residents with targeted training to meet emerging skills needs.

Gillian Blyth enrolled onto the Gas Installation and Renewable Energy programme after being made redundant. Following a one-year training programme, Gillian is now in full-time employment as a gas service and installation engineer and looking to progress within the energy sector.

"The training I received was excellent and I gained invaluable experience. I am now working as a Gas Engineer and am looking forward to new challenges."

Gillian Blyth, Gas Engineer

WISTON LODGE

An award of £5,000 was made to Wiston Lodge in July 2013 to train young volunteers in delivering a school holiday programme.

Wiston Lodge, near Biggar, delivers tailored learning programmes to young people and vulnerable adults. The award from the Clyde community fund will allow the Lodge to recruit 25 local young people to volunteer at their school holiday programme.

Participants will learn a range of new skills and gain real work experience to increase their prospects of securing future employment or moving into further training, vital in an area where there are few local jobs and limited development opportunities.

Wiston Lodge also received a major grant of £100,762 to part-fund a biomass boiler conversion at the centre, helping to reduce running costs and secure its long-term viability.

"Our volunteering programme reaches young people in this rural area, where training opportunities are scarce for those making the transition to employment."

Wendy Johnstone, Wiston Lodge

INSPIRING THE NEXT GENERATION

INVESTING IN EDUCATION AND YOUTH DEVELOPMENT ENCOURAGES YOUNG PEOPLE TO BE SOCIALLY RESPONSIBLE AND SUPPORTS THEIR POSITIVE TRANSITION FROM CHILDREN INTO YOUNG ADULTS. INVESTMENT FROM SSE FUNDS TOWARDS PROJECTS FOR EDUCATION AND YOUTH DEVELOPMENT TOTALLED £400,000 IN 2013/14.

Development begins from an early age, and last year the funds invested around £230,000 in improving and building new play parks – often replacing facilities in a poor state of repair. Over £33,000 was also awarded towards youth clubs and organisations, providing safe spaces for young people to meet and socialise.

With less statutory funding available, support for outdoor learning spaces in school environments was also a popular theme, with yurts, huts and playgrounds all receiving funding during 2013/14.

CUMBRAE PRIMARY SCHOOL COOK SCHOOL

Cumbrae Primary School Parent Council was awarded £3,000 in October 2013 to start an after school cooking club.

The award from the Hunterston community fund has allowed the Parent Council to establish a cooking club where children learn a range of topics including food hygiene and safety, cooking with a budget, and food nutrition. The club aims to make a difference to young people's thinking and attitudes towards food and its sustainability. As a result, links have been made with the island's community garden in order to demonstrate the cycle of planting and cooking to the children.

The project has improved the children's basic cooking skills and helped them to understand the importance of nutrition and sustainable living at a young age, encouraging them to make healthy life choices.

"I like going to Cook School because it's fun. We learn how to work together, make interesting food and taste new ingredients."

Cole Parrymellor, P5, Cumbrae Primary School

RIGSIDE PLAYPARKS GROUP

In June 2013, Rigside Playparks Group was awarded £32,402 to install a new play park in Rigside, South Lanarkshire.

With only three swings to serve over 180 children, Rigside Playparks Group realised that local children needed new equipment in order to experience the developmental advantages of outdoor play and the benefits of physical activity. The award from the Clyde community fund has allowed the group to install a new play park with a range of equipment suitable to serve the number of children in the area including swings, a see-saw, a rope climber, a zip slide, a climbing frame and a mini roundabout.

The new park was officially opened in April of this year and is already a huge hit with the young children of Rigside. The improved facilities have created opportunities for parents to bond with their children while playing.

"It's pretty special to see all of these children playing, laughing and having fun in a way that hadn't been possible for so long in the village."

Linda Ferguson, Rigside Playparks Group

“THE NEW HUT HAS ENHANCED THE CHILDREN’S OUTDOOR LEARNING EXPERIENCES AND PROVIDES US WITH THE SPACE TO TAKE LEARNING OUTDOORS ALL YEAR ROUND.”

**Kim Ramsay, Head Teacher,
Royal School of Dunkeld**

ROYAL SCHOOL OF DUNKELD

In September 2013, £14,120 was awarded from the Griffin and Calliachar community fund to install an outdoor learning hub at the Royal School of Dunkeld.

The Royal School of Dunkeld Parent Partnership Group is very active in working with the school to further develop educational and recreational opportunities for pupils. After delivering many successful outdoor learning projects, such as the interactive maths area, the group identified the need for a covered area to facilitate outdoor learning all year round.

The award of over £14,000 for the installation of an outdoor learning hub has allowed the school’s 180 pupils to benefit from a safe and stimulating outdoor space. The new hub can deliver all aspects of the formal and informal curriculum, meeting the needs for hands-on experiences and physical activity. The children can explore and discover in a way that they cannot do in the classroom. The hub provides an excellent resource for the pupils adding value to their learning experience and is also used by other youth groups in the area, such as the Brownies and after school clubs.

**“THE NEW MUSEUM
WILL CREATE A
CULTURAL HUB
FOR LOCAL PEOPLE
TO CONNECT WITH
THEIR HERITAGE
AND A GREAT DAY
OUT FOR OUR
VISITORS.”**

**Suzanne Rigg, Museum Manager,
Biggar Museum Trust**

BIGGAR MUSEUM TRUST

In June 2013, £620,000 was awarded from the Clyde community fund to the Biggar Museum Trust towards a state-of-the-art museum to house its extensive collection.

The five different locations currently housing the Museum’s collection, one of the largest of any local museum in Scotland, are becoming increasingly unsuitable; suffering from poor access, parking shortages and high running costs. Realising this dilemma, the Trust ran a successful local fundraising appeal to purchase the former Stephen’s Garage – a prominent site on Biggar High Street.

The £620,000 award, the largest made from any of SSE’s funds, will contribute towards the costs of converting the property into a modern purpose-built museum. The project, estimated to be worth £1.5 million, will allow the collection to be housed in a single location which will meet modern environmental and security conditions for the permanent collection, whilst providing better access, dedicated parking, and enable staff to deliver training programmes for volunteers. It is anticipated that the new museum will triple visitor numbers to the area and deliver a positive economic impact of £88,000 per year for the local economy through the resulting increased trade at cafés, shops and local businesses.

ADVANCING HERITAGE AND CULTURE

LOCAL CULTURE AND HERITAGE SHAPES THE IDENTITY OF COMMUNITIES AND CAN PLAY AN IMPORTANT ROLE IN ATTRACTING TOURISTS AND SUPPORTING THE VISITOR ECONOMY, OFTEN A MAINSTAY OF RURAL INCOME. OVER £1.1 MILLION FROM SSE FUNDS WAS INVESTED IN PROMOTING CULTURE, HERITAGE AND TOURISM IN 2013/14, CONTRIBUTING TO VIBRANT AND DYNAMIC COMMUNITIES.

It was a milestone year for culture and heritage with £620,000, the largest ever grant from the funds, awarded to establish a new state-of-the-art museum in Biggar, allowing visitors and locals to engage with the area's remarkable history. The funds also supported 30 festivals and cultural events last year, including a whisky festival and a Gaelic Mod, bringing communities together to celebrate their culture and keep traditions alive.

BIRKS CINEMA

In April 2013, the historic Birks Cinema in Aberfeldy opened its doors for business after a £1.4 million redevelopment.

The Birks Cinema, originally opened at the outbreak of WW2, ceased operating as a cinema in 1982 and was finally left derelict in 2004. After a feasibility study carried out in 2006 concluded that reopening the cinema would have significant economic impacts in the local area, the Friends of the Birks Cinema group was created.

On securing funding for the purchase of the building, the group initiated a high profile campaign to raise redevelopment costs. The first grant of £100,000 came from the Griffin and Calliachar community fund, acting as vital seedcorn capital in securing other funding. The target of £1.4 million was raised by January 2012 and doors opened in April 2013.

The Birks Cinema has created 13 jobs and, over a year on, has become a focal point for the local area.

"We've had a fantastic year and now employ 13 people in the community. We also have volunteers from all walks of life who have been key to the success of the cinema. There's been great support from locals and visitors alike."

Fiona Sloan, Birks Cinema

TUMMEL AND TAY FESTIVAL

In December 2013, £5,000 was awarded from the Griffin and Calliachar community fund towards establishing the Tummel and Tay whisky-themed festival in Perthshire.

Three cultural organisations in Highland Perthshire – Birnam Arts, The Birks Cinema and Pitlochry Festival Theatre – came together to establish the new Tummel and Tay Festival. The aim was to increase footfall to arts events during the month of May, traditionally a quiet time of year in the area.

Events were held between the organisations' three venues and celebrated the central theme of whisky with activities such as a whisky-themed food festival, distillery tours, dramatic productions and poetry readings. The Festival was a huge success attracting in the region of 500 visitors and having a positive economic impact in the local area. The groups are already looking forward to staging next year's festival.

"We were delighted to receive this vital boost to support the Festival in its inaugural year. The event was a great success and acted as the perfect showcase for Highland Perthshire's rich cultural heritage."

Mark Davanzo, Pitlochry Festival Theatre

CONTRIBUTING TO ACTIVE AND HEALTHY COMMUNITIES

INVESTMENT IN SPORT AND RECREATION ENCOURAGES PEOPLE OF ALL AGES TO LEAD MORE ACTIVE AND HEALTHY LIFESTYLES. AROUND £230,000 WAS INVESTED IN THIS AREA DURING 2013/14, IMPROVING QUALITY OF LIFE FOR MANY AND CREATING LONG-TERM LOCAL FACILITIES FOR GENERATIONS TO COME.

Last year, over 40 sports clubs benefitted from funding towards purchasing equipment and improving facilities. Provision of sport and recreation facilities in rural communities is a great benefit to individuals who may have to travel long distances to access similar services. It can also have benefits for nearby local businesses through additional footfall.

BIGGAR RUGBY FOOTBALL CLUB

In 2013, the Clyde community fund awarded around £10,000 to the Biggar Rugby Football Club towards pitch improvements and a Mini Tournament.

Biggar Rugby Football Club is a focal point in the local area, working with significant numbers of young people every year. In 2012, the Club was awarded £110,000 towards drainage works on two pitches. An award of £4,914 in June 2013 was used for additional ground work to ensure that young players have a dry, firm surface to train on.

A further award of £4,950 was made in August towards costs of the annual Mini Tournament, allowing the club to fund catering, first aid equipment, medals and kit to ensure the best event possible. Previous years have seen over 400 children taking part and the tournament brings other teams to Biggar for a fun-filled day of rugby matches.

"The mini tournament is one of the first fixtures after the summer holidays. It receives fantastic support from competing clubs and is a great showcase for Biggar RFC and our supporters."

Nigel Pacey, Biggar Rugby Football Club

HIGHLAND PERTSHIRE MARATHON

In September 2013, the Aberfeldy and District Rotary Club was awarded £24,000 to secure the future of the Highland Perthshire Marathon for the next three years.

With assistance from two previous awards from the Griffin and Calliachar community fund, the inaugural Highland Perthshire Marathon was held in September 2012 and was a huge success, with 385 entrants from all over the UK and abroad. The increased footfall brought trade to local businesses, with hotels and B&Bs fully booked over the weekend.

In addition to raising funds for charity, the marathon has reinforced community spirit by encouraging many local businesses and organisations to come together and support the event. The 2013 award will ensure the future of the marathon as a major event in the Perthshire calendar and a self-sustaining enterprise by its third year of operation.

"We aspire to grow this event which already brings significant footfall to the Aberfeldy area, brings the community together and enhances the reputation of Perthshire as a sporting destination."

Jim Anderson, Aberfeldy and District Rotary Club

“THE NEW 3G PITCH IS A GREAT FACILITY FOR ALL AGES AND WILL HELP THE COMMUNITY IN THE DEVELOPMENT OF FOOTBALL AND HOCKEY, ALL YEAR ROUND.”

John Murray, Sutherland Community Sports and Recreation Hub

THE SUTHERLAND COMMUNITY SPORTS AND RECREATION HUB

In May 2014, a grand opening was held at Golspie Sports Pitch after an award of £160,000 from the Gordonbush community fund transformed the old blaes pitch into a modern sports facility.

The Sutherland Community Sports and Recreation Hub was set up to address the poor condition of the former blaes sports pitch in Golspie. The group’s aim is to improve and develop the pitch for the benefit of the community. A new development was proposed comprising an all weather floodlit sports surface, a basketball court, pavilion facilities and a community area for events and gatherings.

The award, which was over 70% of the total project cost, was essential in gaining match funding from Sports Scotland to proceed with the 3G sports pitch stage of the project. The improved surface will increase participation, allow for better coaching and improve technical skills. The pitch is a much needed facility that benefits local schools and community sports, and with 58% of Sutherland’s population living within a 30-minute drive, the need for travelling long distances is greatly reduced.

At the grand opening held in May, SSE joined the community in a football tournament to celebrate the new facility. The group are now progressing with stage 2 of the project.

“BY PRODUCING OUR OWN RENEWABLE ENERGY, WE HAVE SENT OUT A CLEAR MESSAGE TO THE LOCAL COMMUNITY AND BEYOND THAT GLENLUCE PRIMARY HAS GENUINELY GREEN ASPIRATIONS.”

**James Ferguson, Head Teacher,
Glenluce Primary School**

GLENLUCE PRIMARY SCHOOL

Three vertical-axis wind turbines were installed at Glenluce Primary School in Dumfries and Galloway, providing the school with valuable income and sending a positive message to the pupils and members of the wider community.

Glenluce Primary School is a genuine eco school, with three green flag awards to date. Through the various eco initiatives introduced at the school, the pupils have developed a keen desire to look after and improve their local environment.

After working hard to reduce its energy consumption, the school decided to go the next level and install wind turbines on the grounds. An award of £50,000 from the Artfield Fell community fund, one of the largest grants made towards community energy projects from SSE's funds, allowed the staff and pupils to realise this ambition.

Situated alongside the playing field, the three vertical-axis turbines stand 23 metres tall and have an installed capacity of 5.5kW each. The turbines have allowed the school to substantially reduce its carbon footprint and it is proud to share its green ethos with the wider community, which has shown strong local support for the project.

PROTECTING THE LOCAL ENVIRONMENT

A RICH LOCAL ENVIRONMENT IS A STRONG FOUNDATION FOR SUCCESSFUL RURAL DEVELOPMENT. IN 2013/14 OVER £490,000 WAS INVESTED IN ENVIRONMENT AND CONSERVATION INITIATIVES THROUGH SSE'S COMMUNITY FUNDS.

More and more communities are making the best use of their natural resources by developing community owned turbines and hydro-electric schemes. Last year £325,000 was invested in community owned renewable projects, many of which will create 'stand alone' income streams

for the community in the long-term. In addition to large scale initiatives such as these, energy efficiency measures for community buildings were also widely supported, reducing carbon emissions and energy costs for many local facilities.

Several of the funds supported initiatives that focussed on the preservation of local habitats and wildlife. Groups like the Covington and Thankerton Beekeepers are leading the way in safeguarding their local environment whilst using the funds in original and forward thinking ways.

DUNKELD AND BIRNAM COMMUNITY GROWING

In June 2013, Dunkeld and Birnam Community Growing was awarded £5,000 towards the purchase of a new storage shed.

Dunkeld and Birnam Community Growing started planting produce in 2012, supported by a previous award from the Griffin and Calliachar community fund for £13,000. The key focus was to sustainably and collectively grow food, produced on organic principles, for use by local people.

The group now has 60 members who help with a wide range of tasks from planting to selling produce. After an excellent crop of produce in the first year, the team have built a self-sustaining community enterprise that is already able to cover its own running costs. The much needed new shed now means that the group can store equipment and crops safely, reducing the wear and tear that results from open air storage.

"It's been a great year for the field. With the hard work from our volunteers, we've grown and sold a wide range of produce and the new shed has been a really helpful addition."

Dave Roberts, Dunkeld and Birnam Community Growing

COVINGTON AND THANKERTON BEEKEEPERS ASSOCIATION

The Covington and Thankerton Beekeepers Association was awarded £4,991 in June 2013 to purchase equipment and provide training for its members.

The Covington and Thankerton Beekeepers Association was established to address the declining bee populations in the Clyde area. With the help of an award from the Clyde community investment fund to buy equipment and provide training to members, the group plans to improve local bee numbers and increase pollination activity.

Beekeeping is expensive so the Association helps its members by loaning hives for free in order to encourage a wider uptake of beekeepers in the local community. The first bees were welcomed to the hives in May 2013 and by mid-summer this year, nearly a million honey bees will be under the Association's management.

"With the application of a little sunshine many more bees will be out pollinating our flowers and crops and collecting nectar to make delicious honey."

Angus Milner-Brown, Covington and Thankerton Beekeepers Association

INVESTING IN THE WIDER COMMUNITY

IN 2013 THE SSE SUSTAINABLE DEVELOPMENT FUND WAS LAUNCHED, WHICH IS OPEN TO NOT-FOR-PROFIT COMMUNITY GROUPS WORKING WITHIN THE REGIONS THAT HOST SSE'S DEVELOPMENTS.

The creation of this funding programme allows financial support to be directed to defined priority areas in each region, supporting projects that are sustainable – both in impact and the long-term value they will deliver.

This wider area of benefit is determined through consultation with community organisations but is likely to reflect established geographical areas or local authority boundaries. Projects that will benefit the communities near SSE developments are given extra weighting in the application process.

The first Sustainable Development Fund was opened in the Highland region in November 2013 and, following consultation with stakeholders, applications were sought for projects in three priority areas: skills development and job creation; community energy; and the enhancement of the built and natural environment. Over 100 applications were submitted during the first funding round with demand in excess of £4.5 million. The panel awarded 30 projects with a total value of £1.4 million. These projects were chosen by the panel as they demonstrated the potential to deliver transformational impact in the long-term. Details of each award can be found on page 24.

Further Sustainable Development Funds will open in the Scottish Borders, Dumfries and Galloway, and Perth and Kinross regions in the next 18 months.

Pictured: Top left: Wick High School pupils with one of their 3D creations.

Top centre: Engineers from Knoydart Renewables at the remote community hydro scheme.

Bottom centre: Studying plans for the new Caledonian Canal Visitors Centre.

Bottom right: The 'Mermaid of the North' statue at Balintore, Easter-Ross.

MAKLAB NORTH

MAKLab was awarded £40,000 to establish a workshop and mobile lab to deliver access and skills training in digital fabrication technology.

MAKLab is Scotland's only open access community digital fabrication studio. The MAKLab North workshop will be hosted by Wick High School, which has a reputation for promoting digital excellence, to allow pupils to accurately design and construct components using 3D printing technology. The additional mobile van facility will visit communities in the Highland region, with the overall aim to increase take-up of STEM subjects and support career paths to emerging industries.

"By having school and community access to cutting-edge digital fabrication technologies we are fostering and inspiring a new generation of makers and engineers."

Chris Aitken, Wick High School

KNOYDART HYDRO SCHEME

Knoydart Renewables was awarded £75,000 towards works to refurbish and increase the capacity of the community hydro scheme fed by Loch Bhraomisaig.

The Knoydart peninsula is not connected to the national power grid network and the community-owned hydro scheme, operated by Knoydart Renewables, delivers electricity to the peninsula's only village, Inverie. Complications with previous refurbishments have meant that the system does not perform to capacity, with demand from the community sometimes exceeding generation. The funding will address this issue and allow further capacity if new homes and businesses are to join the system.

"A more robust system will help us move towards the 280kW of power the turbine is capable of, contributing to the long-term sustainability of the community."

Angela Williams, Knoydart Renewables

“I AM DETERMINED THAT THIS FUND IS USED TO TRANSFORM COMMUNITIES... TO MAKE A REAL AND LASTING DIFFERENCE.”

**Rt. Hon. Lord Jack McConnell
Chair, SSE Sustainable
Development Fund**

The launch of the SSE Sustainable Development Fund in November 2013 represents an important milestone in the development of SSE’s community investment funds.

This new fund has been designed to support large, often more strategic, projects across the regions that host SSE’s wind farms. The fund is guided by a panel of independent experts, helping to ensure that the best projects receive the support they deserve.

CALEDONIAN CANAL VISITOR CENTRE

Scottish Canals was awarded £225,000 to redevelop a visitor centre into a first class heritage interpretation facility, creating a tourist hub for the historic town of Fort Augustus.

The Caledonian Canal is a major tourist attraction running through the town of Fort Augustus, and is operated by Scottish Canals. The award will be used to extend the existing visitor centre, allowing for new and refreshed exhibitions. In addition, five retail pods will accommodate small local retailers, bringing increased vibrancy to the area, especially in off-season months.

“We have long-term ambitions to create something truly special at this iconic location – offering a wide range of activities and bringing employment opportunities, economic prosperity and new visitors to the area.”

Keith Mackie, Scottish Canals

MERMAID OF THE NORTH

An award of £24,900 was made to the Seaboard community in order to save the iconic ‘Mermaid of the North’ statue at Balintore.

The 10 foot mermaid, sculpted from wood covered with a heavy resin, sits on a granite rock on the shoreline. Attracting over 2,000 visitors annually, she has become an iconic attraction, bringing much needed tourist spend to the local area. Severe storms in 2012 caused damage to the sculpture resulting in her being removed from the rock. The grant will allow the mermaid to be replaced with a permanent bronze statue, replicating the original design.

“The mermaid is part of local folklore and has become an important tourist attraction. We hope she will be back on her rock by the time we hold our first ever Fisherfolk Festival.”

Maureen Ross, Seaboard Memorial Hall

SUSTAINABLE DEVELOPMENT FUND PANEL

Rt. Hon. Lord Jack McConnell
Member, House of Lords;
First Minister of Scotland 2001-07

Professor Jan Bebbington
Professor of Accounting and Sustainable Development and Co-Head of School, University of St Andrews

HIGHLANDS AND ISLANDS

HOME TO THE WIDEST SPREAD OF SSE COMMUNITY FUNDS, THE HIGHLANDS AND ISLANDS REGION HOSTS SEVEN DEVELOPMENTS THAT PROVIDE COMMUNITY BENEFIT, INCLUDING TWO HYDRO SCHEMES, COMPRISING A TOTAL CAPACITY OF 265MW. APPROXIMATELY £23 MILLION WILL BE INVESTED THROUGH THESE FUNDS IN THEIR LIFETIME.

GORDONBUSH

THE GORDONBUSH COMMUNITY FUND WILL PROVIDE AROUND £5.2 MILLION TO INVEST IN LOCAL PROJECTS BETWEEN 2011 AND 2036.

The fund benefits an estimated population of 4,680 over the four community council areas of Rogart, Golspie, Brora and Helmsdale.

Annual Fund Payment	£162,040

GLENDOE

THE GLENDOE COMMUNITY FUND WILL INVEST AN ESTIMATED £2.2 MILLION IN LOCAL PROJECTS BETWEEN 2006 AND 2031.

Opened in 2009, Glendoe was the largest conventional hydro-electric scheme to be built in over 50 years. The fund benefits a population of around 2,000 over the two community council areas of Fort Augustus and Glenmoriston, and Stratherrick and Foyers. The Fund is managed locally by the Fort Augustus and Glenmoriston Community Company and the Stratherrick and Foyers Community Trust on behalf of SSE.

KINGAIRLOCH

THE KINGAIRLOCH COMMUNITY FUND WILL PROVIDE AROUND £325,000 TO INVEST IN LOCAL PROJECTS OVER ITS LIFETIME.

Kingairloch is one of SSE's smaller hydro-electric schemes. The annual value of the fund is around £6,500, benefitting a population of around 3,200 across the community council areas of Ardgour, Sunart and Morvern. The fund is administered by the Highland Council on behalf SSE.

Category	Organisation	Award
■	Highland Council – community fund allowance To distribute funds on behalf of SSE	£6,498

BU

THE BU COMMUNITY FUND WILL PROVIDE £25,000 OVER ITS LIFETIME FOR INVESTMENT IN LOCAL PROJECTS.

The annual value of the fund is £1,000, benefitting the geographical area of Stronsay in Orkney. The fund is managed by Stronsay Community Association on SSE's behalf and serves an estimated population of 350.
